HStone kolekcija

HStone je visokokvalitetni kompozitni "solid surface" materijal sa velikim mogućnostima primjene. Sa tehničkog aspekta HStone je prirodni mineral kalcijum karbonata u prahu povezan poliesterskom smolom prilagođenom za ovu upotrebu i obojen prirodnim pigmentom. Sve navedeno mu daje izvanredne tehničke osobine i širok spektar upotrebe i izdržljivosti. Opis i vanjski izgled daju nevjerovatan osjećaj prirodnog kamena, ali istovremeno ima i mnoštvo prednosti u odnosu na isti, kao i niz prednosti u odnosu na keramičke površine.

HStone je materijal namijenjen za potrebe modernog doba!

HStone is high quality composit material with wide range of uses . It is made of polyester resin mixed with natural stone dust . Surface is highly durable and resistant gelcoat with UV stabilizator. All this gives it many advantages over natural and ceramic counterparts .

HStone is really a material for the new age.
