O Nama

HIDRA Stil iz Brčkog je vodeća firma na tržištu Bosne i Hercegovine koja se bavi izradom kada, ugradnjom masažnih sistema na iste, izradom elemenata od umjetnog mermara te proizvodnjom i distribucijom kabina. Osim navedenog nudi i profesionalnu ugradnju opreme, kompetentan servis u garantnom i vangarantnom roku, opskrbu rezervnim dijelovima te druge vidove podrške. Na tržištu Bosne i Hercegovine smo prisutni od 1999. godine, od kada smo imali više transformacija u obliku i organizovanju. U godinama iza nas uspostavili smo saradnju sa renomiranim poslovnim partnerima, kako u BiH tako i van njenih granica, koji vrše prodaju i distribuciju proizvoda iz našeg assortimenta. Sve proizvode iz naše ponude odlikuje povjerenje vrhunski kvalitet uz konkurentne cijene, što je osigurano ugradnjom komponenti renomiranih svjetskih proizvodaca. U njihovu pouzdanost i dugotrajanost uvjerilo se na hiljadu kupaca širom BiH. Naši kupci znaju da je ulaganje u kvalitet najsigurnija i najisplativija investicija, tako da je naša ponuda svakim danom sve veća, te smo u mogućnosti zadovoljiti i najzahtjevnije klijente.

Poslovati sa HIDRA Stilom znači da nikada nećete biti prepusteni sami себи.

Vizija firme HIDRA Stil Brčko je da održimo lidersku poziciju u proizvodnji i distribuciji proizvodnog assortimenta, te da proizvodimo za buduce generacije.

Misija firme HIDRA Stil iz Brčkog je pružanje usluga vrhunske kvalitete, uz optimalan odgovor na zahtjeve naših klijenata, i ostvarenje veće vrijednosti za klijente uz stalno usavršavanje našeg kadra, poboljšanje organizacije te primjena principa upravljanja kvalitetom. Njegovati i postizati uzajamno povjerenje i poštovanje među našim partnerima i klijentima kao glavne osnove za poslovne odnose kojima težimo. Inovativnost u težnjom za liderstvom u regionu pronalaziti nove načine zadovoljavanja potreba naših poslovnih partnera i klijenata.

HIDRA Stil from Brčko is a leading company in the market of Bosnia and Herzegovina dealing with bathtub manufacturing, installation of massage system on the same, creating elements of artificial marble and the production and distribution of cabins. In addition, we also offer professional installation of equipment, competent service during the warranty and post-warranty period, the supply of spare parts, and other forms of support. In Bosnia and Herzegovina we are present since 1999. Since then, we had multiple transformations in capital and organization. In the past years, we have established cooperation with renowned business partners, both in Bosnia and Herzegovina and outside its borders, who sell and distribute products from our range. All products from our offer are characterized by top quality with competitive pricing, which is ensured by installing components of renowned manufacturers. Thousands of customers throughout Bosnia and Herzegovina are convinced in their reliability and durability. Our customers know that investing in the quality is the safest and most profitable investment, so our offer is diversifying every day, and we are able to satisfy the most demanding clients.

Doing business with HIDRA Stil means that you will always have the needed support.

The vision of company HIDRA Stil Brčko is reflected in holding the leading position in the production and distribution of the bathroom-oriented product range, and to continue with the production for future generations.

The mission of the company is providing services of the highest quality with optimal response to the demands of our clients and the achievement of greater value to customers with continuous improvement of our staff, improving the organization and implementation of quality management principles. To foster and achieve mutual trust and respect among our partners and customers are the main basis for business relations to which we constantly strive for. Make constant innovations and strive for leadership in the region, to find new ways to meet the needs of our business partners and clients.

Kade HIDRA stil-a:

Hidra stil proizvodni program kupaonih kada bredniranih kao HIDRA izraene su od 100% lijevanog sanitarnog akryla oja anog poliesterskom smolom i staklenim vlaknima. Ve dugi niz godina akril (PMMA - Polimetilmetakrilat) se smatra najpogodnjijim materijalom za proizvodnju kupaonih kada. Odlikuje se postojanošću boje (UV stabilnosti), visokom tvrdostom, hemijskom otpornošću i bespriječnom sjajem.

Zahvaljujući svojoj molekularnoj strukturi kupaone kade od sanitarnog akryla izuzetno su glatke i imaju minimalnu mikroskopsku poroznost pa se bakterije i mikroorganizmi ne zadržavaju na površini kade. Sam akril (PMMA) je jedan od najkorisnijih materijala današnjice koji je našao primjenu u mnogim područjima gdje se zahtijeva kvalitet, trajnost, sigurnost i visok stepen funkcionalnosti.

Lijevani sanitarni akril moderna je, unaprijeđena, vrsta akryla koja se dobiva puno komplikovanim postupcima od ekstrudiranog akryla, te samim time ima visoku cijenu koštanja. Liveni sanitarni akril ima praktične neograničene vrijek trajanja, uz nepromijenjene osobine, neovisno o faktorima kojim je izložen (toplina, sunce, hladnoća, prašina itd.). Uprkos njegovoj minimalnoj težini i debljinama, gotovo ga je nemoguće slomiti. Zbog velike površinske tvrdosti, površinu kupaonskih kada izrađenih od ovog materijala gotovo je nemoguće ogrebatи pri normalnoj uporabi, a ukoliko se to ipak dogodi, materijal se vrlo jednostavno vraća u prvobitno stanje pomoću brusnog papira visoke granulacije ili primjene finih polirpasta.

Hidra stil assortimanini preko 60 modela, ergonomski oblikovanih, kupaonih kada dostupnih u različitim dimenzijama i oblicima, a dodaci i pribor kao što su masažni sistemi, kabine za kade, obloge, miješalice, kromoterapije, aromaterapije, naslanja i za glavu te rukohvati dostupni su Vam na izbor kako bi se što više prilagodili Vašim željama i potrebama.

Sistem upravljanja kvalitetom ISO 9001:2000, koji se sprovodi u Hidra stil-u, nalaže kontrolu sirovina na dnevnoj bazi kako bi se osigurala postojanost naših proizvoda.

Kupaone kade izrađuju se u skladu sa normom BAS EN 198, prema internacionalnoj klasifikaciji standarda za akrilne kade (ICS), te prolaze zahtjevnu internu kontrolu.

Sve HIDRA kupaone kade imaju 10-godišnju garanciju i servis dostupan na teritoriju cijele Bosne i Hercegovine.

Kade i tuš kade izrađene od lijevanog sanitarnog akryla imaju mnoštvo prednosti nad keramičkim i metalnim pandamima:

- a) Lijevani sanitarni akril daleko je najugodniji materijal na dodir i tokom dugogodišnjeg korištenja;
- b) Zahvaljujući i kvaliteti i savitljivosti ovog materijala, termoformiranjem je moguće dizajnirati ergonomijske oblike kupaonskih kada i na taj način doprinjeti zdravlju Vašeg tijela;
- c) Prosječna akrilna kada teži oko 20 kg, a metalne i keramičke kade nekoliko puta više, odnosno lakša je ugradnja i manipulacija proizvodom;
- d) Održavanje je iznimno jednostavno, potrebno je samo periodično ispiranje ne isto a neabrazivnim sredstvima;
- e) Emajliranje nije potrebno;
- f) Površina akrilnih kupaonskih kada izuzetno je glatka pa se bakterije i ostali patogeni elementi na njoj ne nakupljaju tokom vremena;
- g) Pogodne su za ugradnju masažnih sistema, za razliku od keramičkih i metalnih.

HIDRA Stil bathroom production program branded as HIDRA are made from 100% cast sanitary acrylic reinforced polyester resin and glass fiber. For many years, acrylic (PMMA - Polymethylmethacrylate) is considered to be the most suitable material for the production of bathroom tubs. It is characterized by color stability (UV stability), high hardness, chemical resistance and flawless glow. Due to its molecular structure, sanitary acrylic bathtubs are very smooth and have minimal microscopic porosity, so that the bacteria and microorganisms do not stay on the surface of the tub. Acrylic (PMMA) is one of the most useful materials today and it is applied in many areas where the quality, durability, safety and a high degree of functionality is highly required.

Cast sanitary acrylic is a modern and improved version of acrylic that is made through more complicated procedures of extruded acrylic, and therefore has a high cost price. Cast sanitary acrylic has a virtually unlimited service life, with unchanged characteristics, regardless of the factors which it is exposed (heat, sun, cold, dust, etc.). Despite its minimal weight and thickness, it is almost impossible to break. Due to the high surface hardness, surfaces of the bathtubs made of this material are almost impossible to scratch under normal use, and if the worst happens, the material can be very simply returned to its original state by using sandpaper grit or high application fine polishing paste.

HIDRA Stil assortment consisting of more than 60 models, ergonomically designed, is available in different sizes and shapes, add-ons and accessories such as massage systems, cabins for baths, compresses, mixers, chromotherapy, aromatherapy, armchairs, headboards and handrails are available to you by choice in order to be more adapted to your needs and desires.

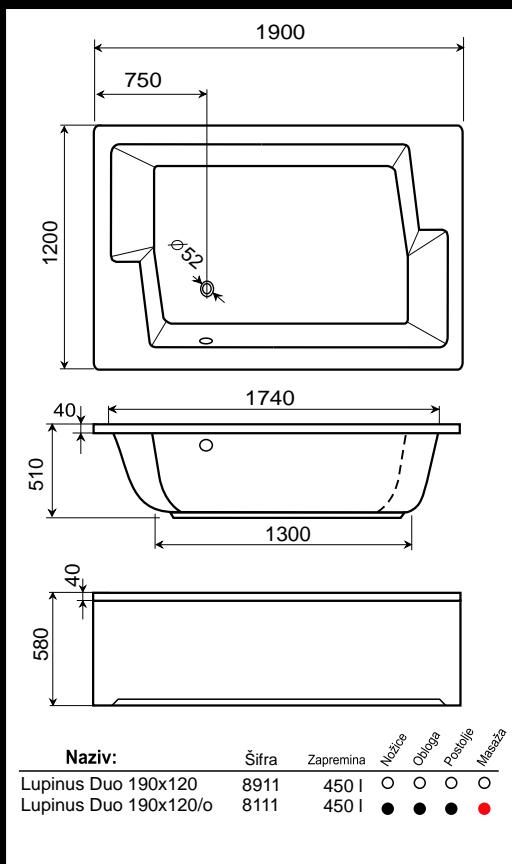

Quality Management System ISO 9001: 2000, which is implemented in HIDRA Stil, requires control of raw materials on a daily basis in order to ensure the consistency of our products.

Bathroom tubs are made in accordance with standard EN 198, according to the international classification standards for acrylic bathtubs (ICS), and through a very demanding internal control.

All HIDRA bathroom tubs are under 10-year warranty and the service is available throughout the whole territory of Bosnia and Herzegovina.

Masaža vodom

Water massage

Efekat masaže postiže se ubacivanjem vode u kadu pomo u vodenih mlaznica ugra enih na stranama kade.

Pomo u vodenih mlaznica postiže se odlian površinski i dubinski efekat masaže pojedinih dijelova tijela.

Površinski efekat se manifestuje u poja anoj cirkulaciji krvi, a dubinski efekat se odnosi na masažu kompletne tjelesne muskulature.

Effect of the massage, which gives you excellent surface and deep massage of certain body part, is achieved of water through installed jets on the side of the bathtub.

The surface effect is manifested in the increased blood circulation, while the deep effect refers to the massage of the entire body musculature.

Kombinovana masaža

Combined massage

Objedinjuje u inke vodene i zra ne masaže te intenzivnim djelovanje na ljudski organizam regenerira ga i opušta.

Vodeni mlaz razbija zra ni mlaz u sitne zra ne mjejhuri e, koji se miješaju sa vodom te svojom kineti kom energijom intenzivno masiraju tijelo.

Unites the effects of water and air massage and with intensive action relaxes and regenerates human body.

Water stream breaks air stream into the tiny air bubbles, which are then mixed with the water and with kinetic energy massages body.

Water temperature
Water temperature during the massage should be around 38°C.
Normal human body temeperature is between 36,5-37°C.

When the water temperature is increased by 1 to 2°C, the body is starting to warm up and skine pores are opening.
This process accelerates sweating and as a result toxins from the body are released.

Masažni sistem *MS 3* ugra en na kupaonu kadu Camelia
Massage system MS 3 installed on the bathtub Camelia

TEMPERATURA VODE

Temperatura vode kod primjene masaže treba da je oko 38 stepeni celzijusa. Normalna temperatura ljudskog tijela kre e se od 36,5 - 37.

Kada je temperatura vode ve a za 1 do 2 stepena, tijelo se po inje zagrijavati te se otvaraju pore na koži. Tim se ubrzava proces znojenja te se putem pora izbacuju toksini nakupljeni u višku vode u organizmu.

Masažni sistem Lux

Massage system Lux

Masažni sistem Lux objedinjuje voden i zračni masažni sistem.

Osim masažnog sistema na kadu su ugrađeni i dodatni elementi: kromoterapija, dezinfekcija, mikrodizne te vodenu i tuš bateriju sa ciljem intenzivnijeg i potpunijeg oslobađanja tjelesne i duhovne napetosti.

Massage system Lux unites water and air massage system.

Except massage system, in the bathtub are installed: chromotherapy, disinfection, microjets and mixer for whole massage experience.

HStone kolekcija

HStone je visokokvalitetni kompozitni "solid surface" materijal sa velikim mogunostima primjene. Sa tehničkog aspekta HStone je prirodnji mineral kalcijum karbonata u prahu povezan poliesterskom smolom prilagođenom za ovu upotrebu i obojen prirodnim pigmentom. Sve navedeno mu daje izvanredne tehnike osobine i širok spektar upotrebe i izdržljivosti. Opis i vanjski izgled daju nevjerovatan osjećaj prirodnog kamena, ali istovremeno ima i mnoštvo prednosti u odnosu na isti, kao i niz prednosti u odnosu na keramičke površine.

Neke od najvažnijih prednosti HStone-a su:

- Materijal je homogen po cijeloj strukturi;
- Ne razdvaja se u slojeve;
- Otporan je na termalne šokove;
- Stabilan je na UV zrake (vrlo pogodan za uporabu u eksterijeru);
- Odlično podnosi visoke temperature;
- Neosjetljiv je na većinu hemikalija;
- Potpuno je neporozan (nema razvoja gljivica);
- Proizveden je na akrilnoj bazi.

Zahvaljujući ovim karakteristikama, ovaj materijal svoju primjenu može napraviti u širokom spektru proizvoda kao što su:

- Umivaonici
- Sudoperi
- Kupaonske i tuš kade
- Pultevi s visokim intezitetom habanja
- Površine za pripremu hrane
- Zidovi i radne površine.

S obzirom da je HStone potpuno neporozan i biološki siguran, idealan je za sva mesta gdje su sigurnost i izdržljivost na prvom mjestu, kao što su bolnice, laboratorije i dr.

HStone je materijal namijenjen za potrebe modernog doba!

HStone is high quality composit material with wide range of uses. It is made of polyester resin mixed with natural stone dust. Surface is highly durable and resistant gelcoat with UV stabilizer. All this gives it many advantages over natural and ceramic counterparts.

Some of the most important advantages of HStone are :

- Has homogeneous structure
- It is undivisible in layers
- It is temperature resistant
- UV stable
- Resistant to the most of the normally used chemicals
- Has a very hard and smooth surface

Due to this characteristics it is used in many products such as :

- bathroom sinks
- Kitchen sinks
- Bathtubs and shower trays
- Kitchen countertops
- Walls

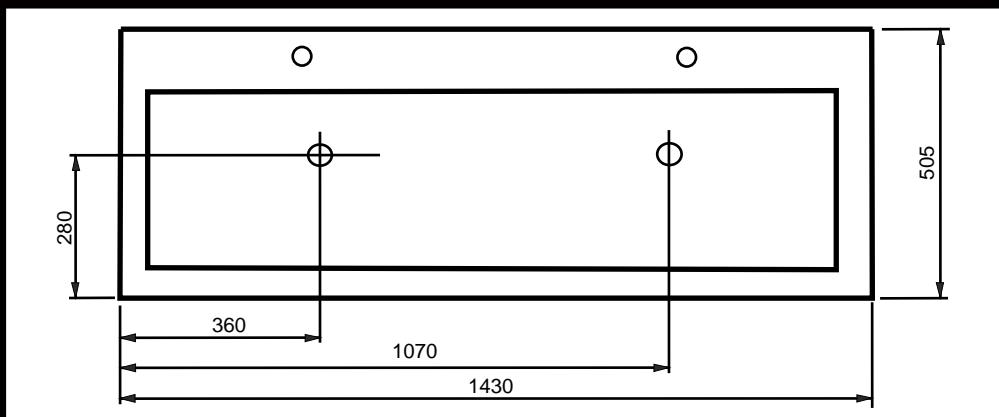

Since the HStone is completely nonporous and biologically safe, it is ideal for all the places where safety and durability is in the first place, such as hospitals, laboratories and others.

HStone is really a material for the new age.

Tuš kanalice/_{shower drain}

dimenziјe: 600, 750, 850 i 950

Tehnički podaci Technical data:

- Dostupno u tri dužine:
Available in 3 lengths:
600; 750, 850 i 950 mm
- Rešetka od INOX-a,
Stainless steel grid
- Otporna na hemikalije i kiseline,
Chemical and acid resistant
- Rasklopljiv hvata prljavštine
Demountable for easy cleaning
- Kompletan odvod te nosti iz kanalice
Complete drainage from canal
- Po visini podesivi nosa i kanalice
Adjustable height
- Samo iste i odvod
Selfcleaning drain
- Odvod te nosti 0,65 l/s
Fluid flow 0,65 l/s
- Dozvoljeno opterećenje 250 kg
Maximum load 250 kg
- Jednostavna montaža
Simple installation.

Naziv proizvoda/Name	Šifra
Kanalica 60/Shower drain 60	10801
Kanalica 75/Shower drain 75	10802
Kanalica 85/Shower drain 85	10803
Kanalica 95/Shower drain 95	10804
